

Features:

*Mercury-free, lead-free and energy efficiency illuminant, environmentally friendly lamp.

*70% more energy saving compared with high pressure sodium lamp.

*Die cast aluminum radiator with maximum interface with air ensures excellent heat extraction function, and the strong and compact structure provides protection to the whole lamp.

*Anodized aluminum reflector keeps the even and efficient lighting effect, and coordinates with the radiator, affecting a cooling system to ensure safe performance for long-hour working requests.

*High Power LED illuminant provides comfortable light without radiation, strobe flash or UV.

*Aluminum PCB with Silicone packaged, dustproof, damp proof, and anti-oxidation.

*Constant, current power supply, and wide range of voltage accepted (AC100—240V)

*Die cast aluminum ballast casing with powder coated finish for corrosion-resistance.

Gentry 165W High Bay LED Light

Description

Gentry LED High Bay replacement lights come complete with the LED lights built firmly into a custom built fixture. **Gentry LED High Bay** replacements have life spans of greater than 50,000 hours, and do not require ballast, which saves an additional 10%-20% on wattage usage. These fixtures come with a patented quadric lighting reflection in 45°, 84° or 120° LED beam angles. The fixtures are made with die cast aluminum for optimal light diffusion.

Specification Features

Item No	GI-GKD-AP165
Power Consumption	165W
Voltage	100 V - 240VAC 50/60Hz
Power Factor	90
IP Rating	IP 22
Luminous Flux	9652 Lm
Optical Angle	84°
Light Source	126*1W high power LED's
Center Illumination	442 (4 Meters from Lamp)
Dimmable	No
Operating Temperature	-20C to +50C
Certificate	CE; RoHS
Body Material	Die Cast Aluminum
Rated Life	>50,000 hrs

APPLICATIONS:

* Warehouses, Stages, Gyms, Stadiums, Supermarkets, Shopping Centers, Highway Tolls, etc
 * Great for institutions looking to reduce energy consumption without sacrificing quality.
